SMARTLIFE LOW CARBON SKILLS FOR WORK PROGRAMME

If you would like to work in construction **SmartLIFE Low carbon Skills for work** can give you the edge. We have direct and exclusive access to local employers looking for people with skills in new green building techniques.

Sign up to one of our training courses and learn how to install triple glazing, clad buildings, insulate walls and roofs, put up a timber frame or steel frame building or install a solar heat pump; we have the course to suit you.

Complete the training and we will update your CV and send it out to our exclusive list of employers who will give your CV prior consideration before going out to the wider market.

It gets better than that; we only have 77 exclusive training places available so this gives you an even greater chance of getting that job.

And as if that wasn't enough the training is absolutely free, we will even pay your travel expenses and provide you with lunch.

What's the catch I hear you ask? The only thing we ask for is that you are over 18 and currently unemployed; for most of our course no previous experience is required although for our solar heat pump and rain water harvesting programmes we require qualified plumbers and electricians. Training ends In November 2011 so be quick.

If you are interested in finding out more contact Adrian Key on 07733 102427 quoting SmartLIFE Low carbon Skills.

This training is financed by European Social Fund and the East of England Development Agency. It is offered in partnership with Cambridgeshire County Council, Fenland District Council, Kings Lynn & West Norfolk Borough Council, College of West Anglia and Cambridge Regional College.

ENDS
